ABS

Suitable plain surface 4mm., max' diameter

(spacer with RX4 fitted)

MODEL

RX4 SPACER

The unit replaces the standard backplate to the reader, offering an alternative method of mounting the module, especially when fitting security projects to existing architecture and using 13mm square conduit cable trunking. The spacer also allows a convenient method of fixing the reader to a desktop, or most other plan surface finishes, giving a greater stand-off to the reader module.

The SPACER provides several screw hole fixing points with a defined cable access to the reader, and easier positioning of wiring to the reader's connection $% \left(1\right) =\left(1\right) \left(1\right)$

Made of tough ABS the spacer affords a firm and solid backing to the reader, and gives a professional look to the finished installation.

Key features

- UK design and manufacture
- Black matt finish
- Tough ABS
- Slim profile
