

Product features

When upgrading or replacing existing card readers, the removal of old systems may sometimes leave a 'footprint' in the decoration, or perhaps superficial damage to plaster or the wall substrate. To provide a clean and simple solution and help mask minor cosmetic damage, we can offer a limited range of **cover plates** to which the backplate of the reader may be fixed.

This simple addition gives a larger footprint to the RX series of readers, and may help to minimise or remove the need to redecorate.

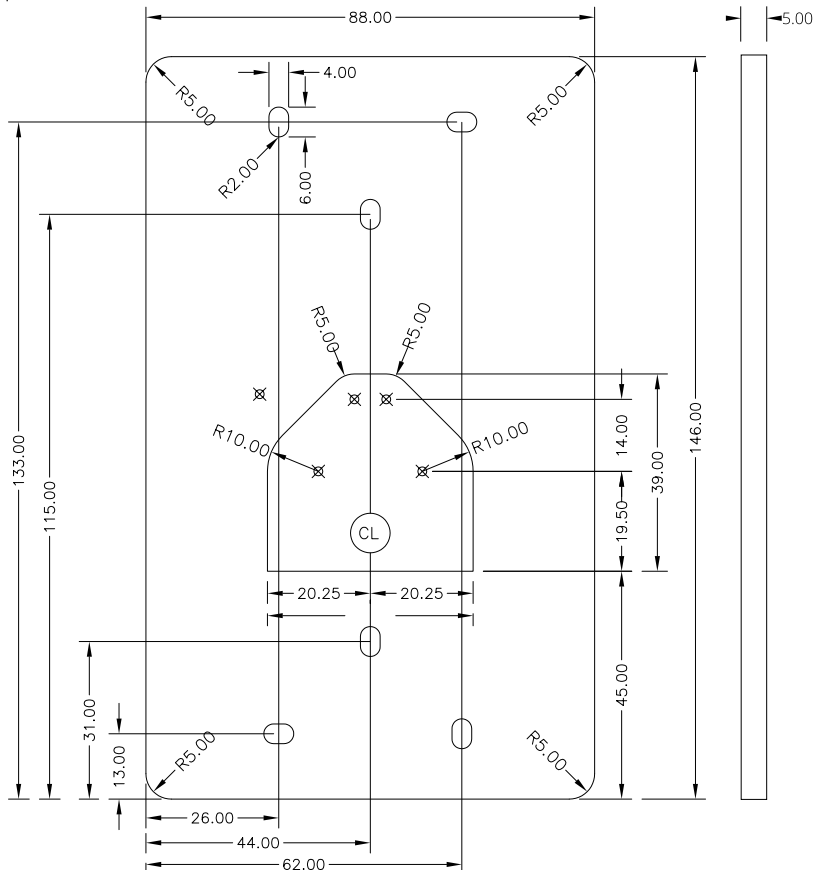

Interfacing

The **cover plate** replicates the screw holes and cable access to each reader, allowing the standard reader backplate to be fixed direct to the wall, through the cover plate. No other fixing is required.

Made of tough acrylic, the cover plate provides a firm and solid backing to the reader, and gives a professional look to the finished product.

Quality design

Third Millennium has more than 20 years of award-winning experience in the design and manufacture of RFID technology, and the delivery of world class, state-of-the-art access control projects to our many global partners.

RX6 COVER PLATE

Part No: RX6-CP

Key Features

- UK design and manufacture
- 5mm thick ACRYLIC template
- Black gloss finish
- Slim profile
- No additional fixing required

RX6 fixed to cover plate
