

Mechanical	
Dimensions	96 x 52 x 13 mm (3.8 x 2.1 x 0.5 inches)
Housing	Moulded polycarbonate
Mounting	Suitable plain surface
Fixing	4mm., maximum diameter

base model No.	Product Description
RX4spacer	<p>The RX4 SPACER is an optional extra, providing a low profile mounting base to the RX4 mullion style access control reader.</p> <p>The unit replaces the standard backplate to the reader, offering an alternative method of mounting the module, especially when fitting security projects to existing architecture and using 13mm square conduit cable trunking. The spacer also allows a convenient method of fixing the reader to a desktop, or most other plan surface finishes ... giving a greater stand-off to the reader module.</p> <p>The SPACER provides several screw hole fixing points with defined cable access to the reader, and easier positioning of wiring to the reader's connection terminal.</p> <p>Made of tough ABS the spacer offers a firm and solid backing to the reader, and gives a professional look to the finished installation.</p>

(spacer with RX4 fitted)

Key features

- UK design and manufacture
- Black matt finish
- Tough ABS
- Slim profile
